East Jakarta, Indonesia

EXPERIENCE

Administrative Staff & Personal Assistant | Aug 2024 – Nov 2024

PT Kalimantan Kotawaringin Rahmat | Indonesia

- Supported executive and administrative operations through effective document management, coordination, and organizational support.
- Managed financial and expenditure documentation to maintain administrative accuracy and reporting consistency.
- Assisted in the review and preparation of business profiles, partnership agreements, and corporate documentation.
- Coordinated company correspondence and maintained structured records of official documents and business communications.
- Documented meeting discussions and maintained records of strategic partner coordination activities.

Procedural Systems Intern | Sep 2023 – Dec 2023

Bank Ganesha | Jakarta Pusat, Indonesia

- Supported procedural governance and policy management initiatives to ensure alignment with internal standards and OJK regulations.
- Contributed to the development and revision of operational procedures, internal guidelines, and business process documentation.
- Collaborated in cross-department policy coordination and compliance monitoring activities.
- Assisted in process improvement initiatives through procedural review, documentation standardization, and flowchart development.
- Ensured accuracy and regulatory compliance of finalized policy and governance documents.

Intern – Multiple Units | Jan 2023 – Mar 2023

Bank Indonesia | Banten, Indonesia

- Supported cross-functional operations across Payment System Policy, MSME Development, and Human Resources units.
- Conducted regional activity data management and operational coordination for policy implementation programs.
- Assisted in designing MSME educational initiatives to support local business development and community empowerment.
- Contributed to employee wellness and workplace health initiatives to enhance organizational engagement.
- Developed strong skills in administrative coordination, stakeholder communication, program planning, and organizational support.

EDUCATION

Data Science & Machine Learning Program | Jan 2026 – Present

Purwadhika Digital Technology School | Jakarta, Indonesia

- Curriculum: Python, SQL, Statistics, Machine Learning, Data Analysis, and Data Visualization.
- Tools & technologies: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly, Tableau, Looker Studio, Google Colab, and VS Code.

- Projects spanning data analysis, natural language processing (NLP), forecasting, recommendation systems, customer lifetime value (CLV) prediction, and machine learning modeling.
- Created a Python-based employee turnover management system with CRUD functionalities, data validation, turnover reporting, and resignation analysis using core Python programming concepts.
- Developed data-driven insights from SaaS sales datasets using Python, statistical analysis, and data visualization to support profitability analysis, discount optimization, and customer segmentation strategies.
- Developed a machine learning classification model for travel insurance claims using Python, Scikit-learn, XGBoost, and LightGBM to analyze customer risk patterns, improve claim prediction, and support business decision-making through statistical analysis and model evaluation.

Bachelor of Management in Human Resource Management | 2020 – 2024

Universitas Indonesia Banking School | Jakarta, Indonesia

GPA: 3.33 / 4.00

Relevant Coursework:

Human Resource Management, Business Administration, Operational Management, Data Management, Organizational Management, Business Regulation

ADDITIONAL

Projects

<https://github.com/mutiararamadhani2002-cell/Sitem-Data-Turnover>

- Created a Python-based employee turnover management system with CRUD functionalities, data validation, turnover reporting, and resignation analysis using core Python programming concepts.

<https://github.com/mutiararamadhani2002-cell/Mutiara-Ayu-Alzahra-Ramadhani-Chapstone-2>

- Conducted end-to-end sales data analysis using Python, SQL, statistical testing, and data visualization to evaluate the impact of discount strategies on profitability, customer segments, and product performance. Identified a negative correlation between discounts and profit, found that discounts above 30% often resulted in negative profit margins, and revealed that the SMB segment was the most affected by high discount rates. Performed exploratory data analysis (EDA), outlier detection, normality testing, and Pearson & Spearman correlation analysis to generate actionable business recommendations.
- Tools: Python, SQL, Tableau, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Folium

https://github.com/mutiararamadhani2002-cell/RFM_SEGMENTASI_ANALYSIS

- Performed customer segmentation using RFM analysis and CV-based behavioral profiling to identify customer behavior patterns and optimize targeted marketing strategies.
- Generated actionable business insights and segment-specific recommendations using Python, Pandas, Matplotlib, and Seaborn.

https://github.com/mutiararamadhani2002-cell/Sentiment_Analysis

- Scraped and analyzed Twitter/X data using NLP techniques to identify public sentiment, trending topics, and dominant narrative patterns for editorial strategy development.
- Generated actionable insights using Python, Pandas, and NLP libraries.

https://github.com/mutiararamadhani2002-cell/Stock_Forecasting_System

- Built a stock forecasting system for IDX equities using SARIMA and Prophet models with ensemble learning for time series prediction and trading signal generation.
- Applied AutoARIMA optimization, seasonal trend modeling, and performance evaluation using MAE, RMSE, MAPE, and R² metrics.
- Developed and deployed an interactive Streamlit dashboard with Plotly for real-time stock analysis and visualization.

https://github.com/mutiararamadhani2002-cell/Recommendations_System

- Built a hybrid recommendation system integrating Collaborative Filtering, Content-Based Filtering, and popularity-based models to address warm-start and cold-start recommendation challenges.
- Developed personalized recommendation pipelines using Python, Scikit-learn, and Pandas.

https://github.com/mutiararamadhani2002-cell/CAPSTONE_3_Travel_Insurance_Classification

- Developed an end-to-end machine learning classification model for travel insurance claim prediction using Python, Scikit-learn, XGBoost, and LightGBM. Performed EDA, feature engineering, preprocessing pipelines, hyperparameter tuning, and class imbalance handling techniques (SMOTE, NearMiss, and class weighting) to improve claim detection performance. Evaluated models using Recall, F1-Score, PR AUC, and ROC AUC to generate actionable business insights for customer risk assessment.
- Tools: Python, Scikit-learn, XGBoost, LightGBM, Pandas, NumPy, Matplotlib, Seaborn

Organizational Experience

Graphic Design & Documentation Division Staff | Apr 2021 – Jul 2022

Himpunan Mahasiswa Indonesia Banking School

- Supported student organizational activities through graphic design, event documentation, and visual communication initiatives.
- Designed promotional and publication materials for seminars, business events, social responsibility programs, and student development activities.
- Managed event documentation and visual content creation to improve audience engagement and organizational branding.
- Collaborated with cross-functional committees in planning and executing academic and non-academic events.
- Contributed to multiple university events including Business & Marketing, Digital Marketing, Design Competition, Debate Competition, and Social Responsibility programs.

Skills

- Programming & Tools: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly), SQL
- Data & BI Tools: Tableau, Looker Studio, Google Colab, VS Code
- Machine Learning: Supervised & Unsupervised Learning, Time Series Forecasting, Recommendation Systems, Feature
- Engineering, Model Evaluation
- Canva, Microsoft Word, Microsoft Excel, Google Sheets, Google Slides

Languages

- Indonesian: Native
- English: Advanced (TOEFL 523)
